

```
19 private static int score;
20 private static int sum;
21
22 public Average(){
23
24     sum = 0;           //이것을 해줘야 계속 값이 안더해짐
25     range=MAX-MIN+1;
26 }
27
28 public void studentScore() {
29
30     for (int i = 0; i < STUDENT_NUM; i++) {
31         score = (int) (Math.random() * range);
32         sum += score;
33     }
34     average=sum/STUDENT_NUM;
35 }
36
37 // public static int getAverage(){
38 //     studentScore();
39 //     return sum/STUDENT_NUM;
40 // }
41
```

여기선 get을 만들어주고 받아와서 실행은 잘 됩니다.
@Data를 써서 넣어주고 싶은데 get이 빨간색으로 뜹니다. 뭘
잘못했을까요?

```
12 @Controller
13 public class Bank8Controller {
14
15     @RequestMapping("/homework1")
16     public String bank8Homework1 (Model model){
17         log.info("homework1");
18
19         model.addAttribute("attributeName: num", Sequence.getTotalNum(count: 21));
20
21         return "26th/homework8";
22     }
23
24     @RequestMapping("/homework2")
25     public String bank8Homework2(Model model){
26         log.info("homework2");
27
28         Average avg= new Average();
29
30         avg.studentScore();
31         model.addAttribute("attributeName: avg", avg.get);
32
33         return "26th/homework8Num2";
34     }
35 }
```
